EDUCATION

GGSIPU

MCA in Computer Applications
May 2020 | Delhi, India

GGSIPU

BCA in Computer Applications
May 2017 | Delhi, India

SKILLS

LANGUAGES & DBS

Go (Golang) • Java • TypeScript
Node.js • SQL • MySQL
MongoDB • Amazon DynamoDB

FRAMEWORKS & CLOUD

gRPC • Protocol Buffers (Protobuf)
Gin • Gorilla/Mux • Echo • GORM
Spring Boot • Docker • Kubernetes (K8s)
Bazel • AWS (Lambda, S3, API Gateway)

DEVOPS & ARCHITECTURE

CI/CD (Azure DevOps, GitLab CI)
Microservices • Distributed Systems
System Design (HLD/LLD) •DDD
Prometheus • Grafana • NGINX
Unit Testing (Testify, Mocking, TDD)

CERTIFICATIONS

- **AI & LLMs:** Anthropic Claude, Be10x
- **Golang & DB:** SoloLearn, MongoDB
- **Enterprise Java:** NIIT Technologies

ACHIEVEMENTS

- Awarded **"One-Man Army"** recognition for independently shipping critical microservices end-to-end.
- **Runner-Up (Banking Hackathon):** Built an AI-driven code migration pipeline to automate legacy language translation across banking systems.

PROFESSIONAL SUMMARY

Senior Backend Engineer with 6+ years architecting high-throughput, distributed microservices and cloud systems. Specialized in **Go (Golang)**, **gRPC / Protobuf**, and **AWS** with proven impact in microservice system design (HLD/LLD), runtime/latency optimization, automated data reconciliation, and full-stack observability via **Prometheus** and **Grafana**.

WORK EXPERIENCE

KAIROS TECHNOLOGIES | Senior Software Engineer

Nov 2024 – Sept 2026 | Remote, India

- Authored HLD/LLD specs for 5 distributed microservices, mapping inter-service flows, Dead-Letter Queues (DLQ), automated S3-to-DB cron ingestion, and third-party wallet integrations.
- Engineered 2 backend microservices in **Go** using **gRPC** and **Protobuf** (Bazel, AWS) for the mobile app; slashed API latency by flattening and streamlining JSON response payloads.
- Halved data crunch time from **6h to 3h (50%)** and cut cron execution from **3h to 20m**; built an automated deduplication endpoint and recurring job to resolve multi-location contract collisions.
- Instrumented **Prometheus** metrics and designed **Grafana** dashboards for API triage, EV remote charging session states (success/failure), sub-CPO/location filters, and dual-tariff tracking.
- **Tech Stack:** **Go, gRPC, Protobuf, Bazel, AWS (S3, DLQ), Prometheus, Grafana, MySQL, Docker, Kubernetes, Azure DevOps, Microservices.**

ASCENDION ENGINEERING | Software Engineer

Nov 2022 – Oct 2024 | Bangalore, India

- Migrated 200K+ healthcare records to AWS cloud databases via automated ETL and schema mapping pipelines with zero downtime.
- Engineered modular REST microservices in **Go** using **Gorilla/Mux, GORM**, and **MongoDB**; standardized unit testing with **Testify** and automated CI/CD via **GitLab CI** and **Harness**.
- **Tech Stack:** **Go (Golang), REST APIs, Gorilla/Mux, MongoDB, GORM, Testify, Docker, AWS, GitLab CI, Harness, Microservices.**

COFORGE | Senior Software Engineer

July 2020 – Nov 2022 | Greater Noida, India

- Engineered core transaction and ledger engines on the Evo SaaS platform, powering pawn-broking workflows across 150+ retail dealer branches.
- Implemented asynchronous task prioritization and SLA queue frameworks; decomposed monolithic features into scalable **Go** and **Spring Boot** services on AWS.
- **Tech Stack:** **Go (Golang), Echo, TypeScript, AWS (Lambda, DynamoDB, API Gateway, CloudWatch), Java, Spring Boot, MySQL, Git, Microservices.**

NIIT TECHNOLOGIES LTD | Trainee Java Developer

Jan 2020 – July 2020 | Greater Noida, India

- Developed 12+ REST API endpoints using **Java, Spring Boot**, and **MySQL**; built responsive **Angular** UI components with serverless **AWS Lambda** event triggers.
- **Tech Stack:** **Java, Spring Boot, JPA/Hibernate, MySQL, AWS Lambda, Angular, Git, Microservices.**
